

MINI MAX

Rechargeable LED work light with USB power bank

MINI MAX is a new, universal all-round work light designed for all kinds of application.

The lamp is remarkably slim, handy and compact with a maximum light output. In folded position, MINI MAX is extremely compact (only 41mm) and designed to be conveniently hand-carried by the integrated carrying handle.

Due to the flexible handle the MINI MAX can be placed in different positions to obtain the desired lighting angle. The handle is also equipped with a hole for wall suspension.

As an extra feature, MINI MAX has a built-in power bank with USB outlet to charge mobile devices.

Featuring the latest and unique COB LED technology, the MINI MAX provides extremely high light output, with a uniform and even illumination. The housing is made of sturdy diecasted aluminum and resistant to strokes, shocks and vibrations. The durable construction approves MINI MAX to ROUGH SERVICE USE which makes it perfect for the demanding, rough working environment.

The compact, handy design and maximum light output also makes the MINI MAX suitable for any kind of application, including leisure. Thus, potential application areas could be camping, sail boating, summer house etc.

Due to the very attractive pricing combined with inexhaustible application areas the MINI MAX offers a large volume potential.

- Rechargeable LED work light with maximum light output, up to 900 lumen
- Ultra-slim and compact design
- Durable for ROUGH SERVICE USE
- Handy integrated carrying handle
- Flexible positioning
